SENATOR JONES ON SAND

ACCORDING to the Congressional Record Senator Jones of New Mexico recently made a speech in the senate opposing a proposed import tax on sand. The Herald has received a copy of the speech with a request that we publish it. It is an amusing speech but somewhat too long for reproduction. It was delivered, we surmise, as part of the democratic program of obstruction of the tariff bill, in which program Senator Jones is taking a leading part.

Recently when the Senate voted on the tariff on wheat, Senator Jones voted with the republicans in favor of a rate reported to be five cents higher than that in the house bill. This was in the interest of New Mexico farmers. No doubt when the wool tariff comes up Senator Jones will vote for that also, in the interest of his constituents. In the meantime he is one of the leaders in a campaign of obstruction against the entire tariff measure. This is in the interest of democratic party policy, no doubt; but it is hardly in the interest of Senator Jones' constituents.

Senator Jones's speech on the import tax on sand hit the nail on the head. So did his vote on the wheat schedule. So, no doubt, will his vote on the wool schedule. His attitude toward the whole tariff measure seems designed to hit his constituents in the pocket book.

A SUCCESSFUL START

THE OPENING session of the University of New Mexico summer school is successful. The attendance of 200 is larger than had been expected, although not as large as might have been obtained had funds been available for a wider advertising campaign. It is important, however, that the attendance has been large enough to insure the success of the undertaking from a financial as well as an educational standpoint. A start has been made and a foundation laid upon which an important growth in the usefulness of the University will be built. President Hill and his associates are to be congratulated upon carrying through an enterprise which presented many obstacles, most of which have been overcome by the success of the opening session.

THE ROAD TO RICHES

ICH men play different systems. John D. Rockefeller has been quoted as attributing his wealth to his ability at borrowing money. Henry Ford doesn't believe in borrowing.

The Ford Motor company originally was capitalized at \$100,000. Only about 28,000 of this was subscribed in cash.

That was the only money that ever went into Ford's business from the outside. Additions to the operating capital have been created by the Ford business—taken from profits.

Three years ago, Edsel Ford bought out the minority stockholders. They had 41½ per cent of the Ford stock, for which Edsel paid "about 75 millions," according to Henry Ford, writing in McClure's Magazine.

In other words, an original investment of \$1,620 sold for \$75,000,000.

Ford climbed to success without borrowing much.

Henry Ford, when he decided to make autos instead of watches, had wonderful vision and organizing genius, also an almost superhuman genius at mechanical production.

He also had, however, an easier opportunity than John D. Rockefeller.

Both men created industries. Rockefeller had, as his greatest handicap, this problem: In the early days of the oil industry, the price of crude oil was on the

ground they could not afford to buy.

WE AINT GOT ANYTHING TO DO TO-DAY SO LET'S STOP AND GET JAY AN' GO SWIMMIN'

THAT'S A GO

THE REFEREE

By Albert Apple

GREEN

At the age of 182, Miss Mary Anne Thompson of Waltham, Mass., announces that she is thinking of getting her life together.

She probably has a sense of humor and is something like us.

Concerning Thompson, she comments: "The mother girl is much smarter than the young girls of today. At least, they are the same masses who in old days mainly carried a little coal stove with them to catch to keep them warm."

Each generation thinks its young people are going to the dogs. It is refreshing to meet an aged person who not only has faith in Young Americans, Mrs. Thompson has lived through many breakneck and tempestuous waves and found the pendulum always swing back to normal before going far astray from normal to stop the clock.

COURAGE

In 1850 Emerson, the American philosopher, wrote: "It is said that the world is in a state of bankruptcy, that the world owes the world more than the world can pay and ought to be taxed heavily and taxed well."

Men are saying today what Emerson wrote 72 years ago.

The world, however, didn't go to pot after 1850. Instead, it moved into a golden age of commercial expansion and increasing prosperity in the form of higher standard of living. History always repeats.

PANAMA CANAL

The Panama Canal in the last 12 months sold Uncle Sam an income of \$11,517,000 from ship tolls.

This is a return of three percent on the canal's original cost, \$375,287,000, and from the three percent must be deducted expenses of operation and repairs.

As a business proposition, the canal is not much of a success to the people who put it in. The national defense is the real purpose—it is a sound and wise investment.

AMOR

There were blizzards in Australia in the last six months. Auto killed 12,500 Americans and caused 1,000 in 1921, says Alfred W. Whitney, insurance expert.

We have a long way to go before we can claim to be thoroughly educated and nationally sane.

Teenagers are due to make insanity into national insanity by the beauty of carelessness.

ROCKEFELLER

Tax collectors are licking their chops. Time figure is that if the late Rockefeller's estate totals \$200 million, about \$100,000 of it will be taken by inheritance taxes.

In its present form, the inheritance tax could do nothing but stop the perpetuation of ultra fortunes. There seems to be no other way to stop them than to tax them beyond the point that the taxable portion of the property is handled. What they leave behind after taxes are turned across the floor.

PRICES

Watermelons that are sold for 25 cents apiece in general stores cost consumers \$1 to \$1.50 in New York markets. This is announced daily by Joseph Hirschel H. Jones, market official of our largest city.

Watermelons are typical of general commodities.

The problems of production are nearly solved.

Problems of distribution get farther from solution each year. There seems to be no solution except to grow your own watermelons or stop eating them.

COPES

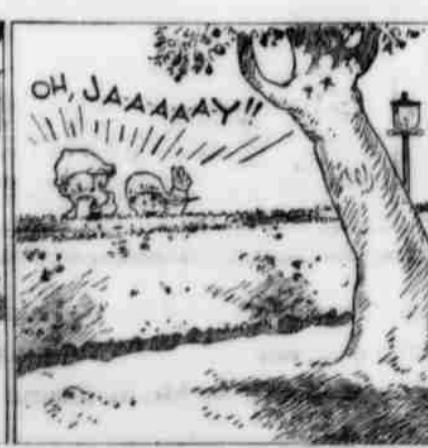

The word "cop" originated in London from the initials of "constable of police." This interesting name of information comes from Knight, New York City's police commissioner.

Knight has 12,000 policemen under him, 3,000 being traffic cops. There are 11,000 guard 7,000.

There are 1,000 police dogs.

This naturally is an average for the nation, on which basis each American policeman keeps an average of 428 copies and \$76.00. They are not inefficient but they do a fairly good job of it, considering the ground they cover.

WHY A DOG LIKS A MAN'S HAND

By PROF. M. J. ELIOT, Chair of Biology, University of Montana

When Mr. Gurney spent all night

in the jungles of Africa, studying

monkeys and gorillas, he discov-

ered a feeling of山水

and regret for his dead.

Many similar instances are re-

corded.

With other animals the act of

licking indicates something akin to

what we call love.

The world is better than it was

when a dog takes the hand of his master or

attempts to lick his master's face.

It is but his canine expression of

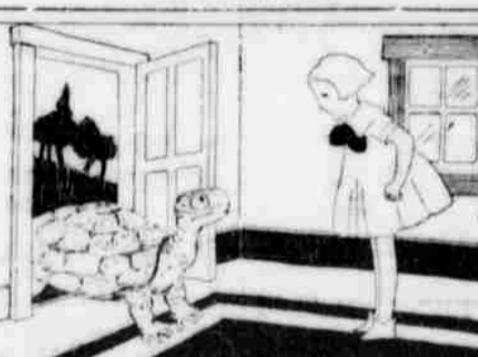

affection, fidelity, and devotion.

ADVENTURES OF THE TWINS

TORTY TURTLE'S TUMMY IS TREATED

By OLIVE ROBERTS BARTON

Story Number 829

In walked Mr. Torty Turtle, moaning and groaning.

"Here you are, Torty," said he kindly. "I know exactly what's wrong with you. Here are five kinds of medicine; one's for the pain in your ear, one's for the inflammation in your toe, one's for that great swelling and the last is to give you an appetite."

"It's always makes the spot where a patient is ill to feel better," said Torty.

"The world is better than it was when a dog takes the hand of his master or attempts to lick his master's face," said Torty.

A woman in a maid's uniform stood behind him, holding a cloth.

"Women will be more equal until they start following men where rulers are not so short."

"Tariff on sugar will cost us \$20,000,000 a year unless we raise
